Job Description

Design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc.

As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will be responsible for defining and developing software for tasks associated with the developing, designing and debugging of software applications or operating systems.

Work is non-routine and very complex, involving the application of advanced technical/business skills in area of specialization. Leading contributor individually and as a team member, providing direction and mentoring to others. BS or MS degree or equivalent experience relevant to functional area. 7 years of software engineering or related experience.

Responsibilities

Cloud Engineering Infrastructure Development

Do you want to build great things in a vibrant, smart, high energy team? Are you an experienced technical leader looking for a role to have a bigger impact? We are looking for a Principal Member of Technical Staff with experience in cloud, micro-services and building highly scalable APIs to join our development team. The ideal candidate will be technically strong and must have an understanding of large-scale distributed systems (cloud-based environments). In addition, they will have a good experience of taking major features from start to release. This role will drive the technical aspects of our product definition, contribute to the product strategy of our solutions, and contribute to the development of next generation Platform system features for Oracle's IaaS cloud environment.

As a Principal Member of Technical Staff you will be responsible for ensuring that our cloud infrastructure solutions are designed and built with the highest level of scalability, customer satisfaction and operability in mind. You will partner with other development teams responsible for architecting, designing, and implementing solutions within a distributed computing environment. You will conduct threat modeling of systems under development, ensure systems are built to align with security, identity, metrics, search, and others in the design, development, and deployment of distributed systems.

Qualifications

- 6-10+ years of total experience in a technical capacity as a software developer, lead or architect
- 3+ years distributed cloud engineering experience in a software development environment
- Bachelors or Masters in Computer Science or related technical field
- Strong experience and detailed technical knowledge in PaaS/IaaS engineering
- Expertise in developing service-oriented architectures with a focus on APIs, micro-services, containers (Docker)
- Experience in developing software with one of Java,Go, C, C++ as well as scripting languages such as Python is a must
- Experience working with other cloud platform teams and accommodating requirements from those teams (compute, networking, search, store, databases)
- Written and verbal communication skills with the ability to present complex information in a clear, concise manner to all audiences including lead management
- Comfortable in a collaborative, agile development environment
- Experience mentoring other members of technical staff

Preferred Qualifications

- Deep understanding of object-oriented design, specifically within a cloud environment
- Experience with full-stack development including a UI platform such as React or Vue
- Designing deployment models for performance and scale

- Comfortable working with other functions such as product managers and solution architects

At Oracle Cloud Infrastructure (OCI), we build the future of the cloud for Enterprises as a diverse team of fellow creators and inventors. We act with the speed and attitude of a start-up, with the scale and customer-focus of the leading enterprise software company in the world.

Values are OCI's foundation and how we deliver excellence. We strive for equity, inclusion, and respect for all. We are committed to the greater good in our products and our actions. We are constantly learning and taking opportunities to grow our careers and ourselves. We challenge each other to stretch beyond our past to build our future.

You are the builder here. You will be part of a team of really smart, motivated, and diverse people and given the autonomy and support to do your best work. It is a dynamic and flexible workplace where you'll belong and be encouraged.

Qualifications
